Jrsys

What is PDFSign ?

PDFSign is an advanced security PDF document signing solution on cloud and blockchain. We not only support document signing by eMail, but we also provide strong authentication by Safenet USB hardware token, Windows CAPI store certificate, iOS and Android phone or Cloud HSM through Jrsys patented PKI security suites solution to sign the document. It is specially designed for digital transformation and remote workers. Using PDFSign will help enterprise meeting the following information security standards for cloud application :

Electronic Signature Act

ISO27001 Information Security Management System (ISMS)

ISO27701 Privacy Information Management (PIMS)

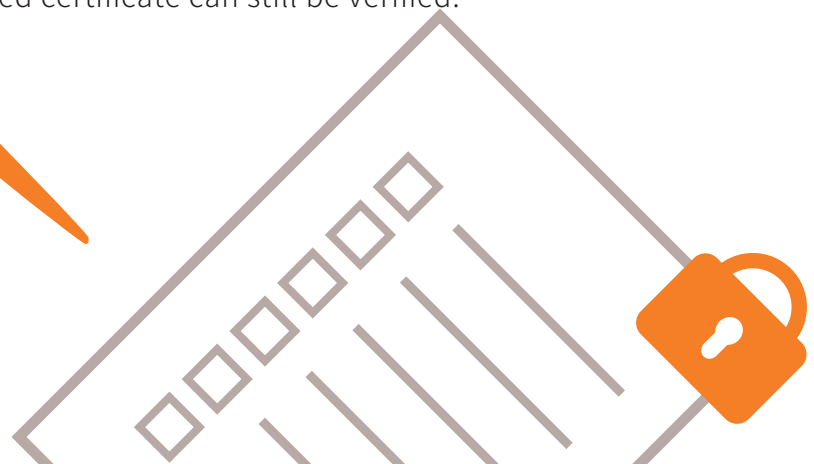

ISO22301 Business Continuity Management Systems (BCMS)

IEC62443 Cyber Security Management System (CSMS)

PDFSign
